LIGHT-REACTIVE LENSES

Visit www.unitylenses.com for the latest information about Unity Via, the progressive lens that's rated 2 to 1 over the leading progressive.²

Visit www.techshieldar.com to learn how TechShield AR Coatings improve visual performance and cosmetic appearance, and outperformed the leading AR for scratch-resistance.³

Visit www.sunsynclenses.com for more details on SunSync Elite, the revolutionary light-reactive lens that changes from dark to clear in seconds.⁴

Every Unity Via order for VSP patients counts toward your Unity target for the VSP Global® Premier Program. Visit pathtopremier.com or contact Josh Sarlin at joshsa@vsp.com for more information regarding the Premier Program.

² In a double-masked randomized crossover study conducted by an independent facility comparing Unity Via to the category-leading progressive, participants were asked to rate the performance of each lens for attributes including close, mid, and far viewing as well as comfort and ease of focus. Each subject also provided the importance and frequency for each attribute that were used to weight the ratings to obtain a total satisfaction score. Unity Via scored significantly higher than the leading progressive.

³ ISO standard Bayer rating tests were conducted by an independent analytical laboratory to compare TechShield AR to the industry leading anti-reflective coating.

⁴ t½ of SunSync Elite in polycarbonate is 53 seconds at 73.4°F. ©2019 Vision Service Plan. All rights reserved.
